

# C-48CNC Universal Drawer Clamp

**DODDS** Model C-48CNC universal drawer clamp assembles drawers of all construction types quickly and precisely.

Ideal for both custom and long production runs, this machine features almost zero set up time and requires no set up tools. It is programmable for opening and closing for different drawer widths. Also features quick set stop pins for different drawer depths. Model C-48CNC assembles drawers with standard English (finger type) dovetails as well as bored and doweled drawers.

Other **DODDS** machines for drawer assembly include Model GP-26E dovetail gluer, which applies the correct amount of glue to the drawer side tenons before the drawer is assembled in the clamp.

## Simplified Operation

Operate the clamp with the touch screen to open and close for different drawer widths. Set the stop pins for different drawer depths, top to bottom. Place the drawer parts in the clamp, and depress the hands free sensors to clamp the drawer.

- 1 Upper platen adjustment servo
- 2 Adjustable upper platen
- 3 adjustable lower platen
- 4 Stop pins for drawer depths
- 5 Adjustable column
- 6 Stationary column
- 7 Center support bar

## Features
